

Research Opportunity for fourth year students

This opportunity will be of interest to fourth year Double Degree students who are interested in solving research problems. The initial project arises from a portfolio application and involves the analysis of certain types of correlation matrices. I am looking for a student with strong mathematical intuition, good programming skills and imagination. Times and dates are flexible. There is modest compensation available per NSERC guidelines. Former students who have worked with me in a similar capacity have gone on to do graduate work at universities such as UBC, Toronto, Stanford, Minnesota, Columbia and McGill .

If this opportunity is of interest and you would like to learn more please email me (Phelim Boyle) with your resume and transcript and we can arrange an interview.
