Add a new Mac to your Mac.

Mac OS X v10.5 Leopard and Leopard Server are the newest releases of Apple's innovative, stable, and compatible operating system for Macintosh computers and Xserve.

Grab a front-row seat for a closer look at the newest features of Leopard and Leopard Server that will transform your Mac at home, in the classroom, in the server room and in your small business.

Who should attend:

Departmental managers/heads in education, general business and government sectors

IT Managers, administrators, and technical evaluators

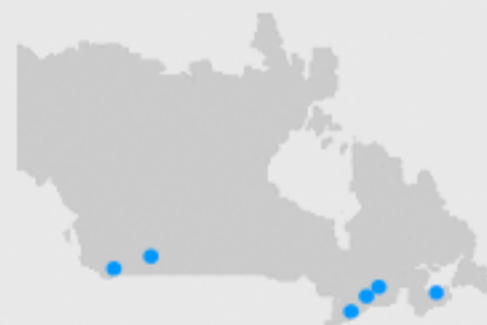

Small business owners, or staff

Individuals who are responsible for evaluating, recommending, or determining technology strategy within their business or learning environments
