

## Introduction to iPhone & iPad Development

Learn the essentials of **iPhone** and **iPad** development: the tools, frameworks, concepts, and best practices - with plenty of hands-on exercises to strengthen your understanding. Training from New Toronto Group and About Objects Inc.

**Date:** September 27 – October 1

### Training Objectives:

- Gain hands-on proficiency with Objective-C 2.0 and the Foundation framework for iPhone/iPad development
- Get up to speed fast on Xcode and Interface Builder
- Learn to write custom iPhone/iPad drawing and animation code
- Access iPhone and iPad user input from touches, as well as from the accelerometer and Core Location
- Set up and manage iPhone and iPad controls such as text fields, buttons, and pickers.
- Work with the iPhone's table views, navigation controllers, and other UI components
- Persist iPhone and iPad application state and user data
- And much more

### Audience:

Take this course if you're:

- A professional developer who has a strong background in a C-like language (C, C++, C#, Java, etc.)
- Interested in learning the iPhone SDK to create great iPhone and iPad applications.

**Location:** New Toronto Group, 4 Robert Speck Parkway, Mississauga, ON
